**MedCenter Systems, LLC Appoints Lisman Holdings, Inc. as National Sales Representative**  
***The MedCenter System – Manage Your Medicine. Manage Your Health***

---

**WILKES-BARRE, PA – February 25, 2011** – Paul Brelo, MedCenter Systems, LLC General Manager, announced the appointment of Lisman Holdings Inc. as MedCenter's national sales representative to selected DME/Home Care Dealers and mail-order companies as well as a select group of electronic retailers. According to Brelo, Lisman Holdings, through their network of independent sales reps, will expand the market penetration of the MedCenter portfolio of products.

Millions of Americans do not take their medicines correctly. People simply forget to take them, are confused about the proper dosage and timing, or lack the personal organization to carry out the, often complicated, task. The significance of medicine noncompliance is a widely unknown national crisis. This crisis is costing our national healthcare system billions of dollars.

With the MedCenter System monthly pill organizer and reminder, taking medications on schedule, becomes part of a person's daily routine. The MedCenter System is designed to organize all medication for an entire month by date, rather than day of the week. Up to 4 daily alarms can be set to alert when medication is due. A repeating friendly reminder provides notification of the time, the date and which daily dose to take. "Good morning! Please take your morning pills for the 20th." After the appropriate pills are taken, press the "Alarm Acknowledged Button" to confirm compliance and the MedCenter Talking Alarm Clock indicates when the next daily dose is due. The MedCenter System also has the following features:

- Tri-Date Verification: matching the visual dates on pill boxes and clock with audible alerts assures accuracy
- Loud and extra loud sound settings ensure the alarm is heard
- Red and green color coding shows when daily dose is complete

“We are very excited about the opportunity that MedCenter brings to the DME/Home Care Dealers, not only from a revenue standpoint, but also the benefits that this product can bring to its user,” according to Jennifer Lisman-Hess, Business Development Manager for Lisman Holdings, Inc. “Ensuring the proper dosage and timing of medication can be a daunting task, but the MedCenter System makes it easy for anyone.”
