Lisman Holdings Inc. Acquires National Distribution Rights to Osti-Klenz *Osti-Klenz Makes Ostomy Care Easy*

WILKES-BARRE, PA – January 3, 2011 – Lisman Holdings, Inc, announces the acquisition of Osti-Klenz ostomy cleaning system for national distribution.

Paul Rosenberg, the inventor of Osti-Klenz, created this product to help those who have had Colostomies and Ileostomies take back their lives. “Colostomies and Ileostomies used to mean you were stuck at home, tied to the bathroom,” said Rosenberg. After having a total colectomy, Rosenberg found the limited options for cleaning an ostomy pouch unacceptable. Through the desire to take back the life he had prior to surgery, Osti-Klenz was born.

Osti-Klenz is a simple device for cleaning your ostomy pouch. In sixty seconds the pouch is clean and odor-free. The process is so quick and easy, it can be performed unobtrusively at home or in a public restroom.

“Lisman Holdings is excited about the acquisition of this new product,” said Jennifer Lisman-Hess, Vice President of Distribution for Lisman Holdings, Inc. “Osti-Klenz is a product that can change people’s lives for the better.”

The Osti-Klenz has changed the inventor’s life and fulfilled his desire to help others in his situation. For more information about Osti-Klenz or Lisman Holdings, visit
