### **NEPA Partners Announces the See 4 Safety Mobility Light** *See 4 Safety - The Intelligent Light for Mobility Safety*

---

**WILKES-BARRE, PA – January 21, 2011** – NEPA Partners, LLC, has begun distributing their newest product, the See 4 Safety Mobility Light.

The See 4 Safety Mobility Light provides users of walkers, canes and rollators with an easily attached automatic light source. The light turns itself on when in motion and when it senses a low level light environment. The “intelligent” light turns itself off after 30 seconds if there is no motion or when it senses a well-lit environment. The patented, hands-free, automatic illumination is the only personal visual aid that knows when to turn itself “on” and “off”.

“The See 4 Safety Mobility Light is a unique item. There is nothing else like it on the market,” says Julie Linge, Inventor of the See 4 Safety Mobility Light and Director of New Product Development “The mobility light is a must have for any walker, cane, or rollator user.”

NEPA Partners, LLC is a joint venture of Beau's Peeps, LLC and Lisman Holdings, Inc. NEPA Partners specializes in the commercialization of products in late stage development for the retail medical, home healthcare markets and selected consumer product segments. NEPA Partners has extensive experience in manufacturing, sourcing, finance, marketing and sales.
